

Assignment 1

IT3040 – ITPM
Semester 1

Group No :	REG/WE/65	
Brief description of the project	<p>An Ecommerce website is an information technology method in which traders, businesses/distributors/marketers can sell products/services and the customer can purchase on that website electronically by using the internet on the mobile and computer.</p> <p>The practice of shopping online is getting increasingly popular. E-commerce is quickly becoming a well-known and widely used business paradigm. More and more businesses are launching websites that provide activism for doing online commercial transactions.</p> <p>The goal of this project is to create a general-purpose e-commerce store where anyone can buy anything (clothes, phones, gadgets, and home appliances) from the comfort of their own home.</p>
